

Healthy sweetie shop

There are many materials around us that can be used for our fun. Prepare cardboard, art supplies and colorful cards, old newspapers needed to make a picturesque candy. Following the instructions, think, and do own, beautifully decorated Candy Shop and confectionery!

1. Cut out the opening window in the vegetable box with a sharp knife. Remember to cut with the help of an adult!
2. Cut out the roof from another piece of cardboard, as in picture No. 5. Brush with glue and glue on the top of the box.

3. After gluing the roof to the box, allow the glue to dry. At this time, start preparing recipes for your Confectionery.
4. As soon as the glue dries, you can proceed to decorating with paints, or colored paper. Stick each wall as you like.

And this is how a decorated Candy Shop can look like!
Have fun inventing, preparing and selling healthy products!
