I am an old box. I served as a packaging, but I'm not needed anymore. I would like to feel useful again. Instead of being crushed and torn I'd rather be a soccer stadium. Will you help me realize my dream? Follow the instructions and build a professional stadium!

Find a few dry, straight branches. Cut them to the same length, then make cuts to better hold the swing arms. Now you can stick heads with plastic caps and T-shirts with pieces of paper. Make a turf on a separate sheet of paper, put it on the bottom of the box. Make holes and cut goals in the box. Decorate the whole with colored paper.

Here are ready table football! Make a ball from cut pieces of plastic or rolled paper and you can play a great match. Thank you for helping me realize my dream!
